

Asset Management

Does your organisation need assistance carrying out Asset Management?

As global Asset Management experts, EA Technology can add value through supporting organisations with everything from asset lifecycles to asset investment management.

Is there a good level of Asset Management knowledge within your business?

EA Technology can provide standard and bespoke Asset Management training courses, which provide an understanding of the fundamental aspects of Asset Management, and how an Asset Management System provides a framework to achieve an organisation's business objectives

Do you achieve the optimum value from your assets?

EA Technology can advise and assist with the implementation of an Asset Management System that will support an organisation to prioritise and optimise asset investments.

Does your organisation understand the importance of effective Asset Management?

Maximising value from your assets and delivering corporate objectives, requires an effective Strategic Asset Management Plan that incorporates whole asset lifecycle planning.

Effective Asset Management maximises value for money by understanding the balance between the likely cost, resultant risk and the expected asset performance throughout all stages of an asset's life.

Do you have the expertise or resources to effectively manage your assets?

EA Technology has assisted many clients to develop and implement an ISO55000 compliant Asset Management System, through:

- The creation of Asset Management documentation
- Stakeholder engagement
- Development of a Strategic Asset Management Plan (SAMP)
- Creating plans that support the organisational objectives
- Optimising the life of assets
- Considering asset lifecycles
- Justifying strategic asset investments
- Providing an independent internal auditing service
- Increasing awareness of brand value

Four steps to ISO55000 certification

What type of organisation will benefit from obtaining ISO55000 certification?

Any organisation that wants to demonstrate its commitment to deriving financial and non-financial value from managing its assets in line with its commitment to quality, performance, safety and the environment.

What benefits can be obtained from embedding an ISO55000 compliant Asset Management System?

An effective Asset Management approach can leverage the power embedded in existing cross functional activities, such as operations and maintenance activities to improve asset availability and utilisation.

EA Technology can support organisations with the following steps on the journey to receiving a certificate of conformity for their Asset Management System against the requirements specified within ISO55001.

	Strategic guidance	<ul style="list-style-type: none"> • Learning and understanding the ISO55000 standard • How will ISO55000 benefit your business • Understanding how to use your assets to meet your company objectives
	Gap analysis	<ul style="list-style-type: none"> • What is your current level of maturity • What are your current asset management strengths and weaknesses • The gap between current processes and the requirements of ISO55001 • What is required to reach certification • Provision of a road map to certification
	Implementation	<ul style="list-style-type: none"> • Alignment with corporate objectives • Implement the road map to certification • Provide asset investment management tools to enable whole life cycle asset management and prioritisation of investments • Managing change and reducing business risk • Creation of Asset Management documentation • Policies and procedures
	Certificate auditing*	<ul style="list-style-type: none"> • Pre audit compliance checks • Independent audit • ISO55000 compliance certification

*EA Technology will only carry out certification auditing if we have not carried out any implementation work
