

Environmental Policy Statement

EA Technology Australia recognises that managing environmental responsibilities is an integral part of its business and embraces the principle of sustainable development. The company is committed to minimising the impact of its activities on the environment.

Specifically, EA Technology Australia is committed to:

- Complying with all relevant environmental legislation and regulation.
- Promoting sound environmental practices throughout the company.
- Using energy and water in an efficient and responsible manner.
- Minimising the generation of waste and implementing recycling initiatives where appropriate.
- Preventing damage to the environment resulting in the release of polluting substances.
- Making the best use of technologies to reduce carbon emissions, where reasonably practicable.
- Having clear indicators to measure environmental performance and encourage the development and continual improvement through applying lessons learnt and best practice.
- Communicating company environmental performance both internally and to the wider community.
- Ensuring this Policy is understood and implemented at all levels in the company and is supported by suitable education and training.

Environmental Objectives

- To periodically monitor and review our environmental performance and take corrective action where necessary.
- To ensure 100% all corrective actions in relation to environmental issues are completed within the nominated time.

Neil Davies
Managing Director
EA Technology Pty Ltd
