# OLIMS Client Portal

Your Data, Anytime, Anywhere

The OLIMS Client Portal redefines how transformer oil diagnostics are managed - digitalising the full process and bringing all your data together in one secure place. Access insights in seconds, stay informed in real time, and make faster, smarter maintenance decisions.

Key Features

Real-time Results and Reporting

View analysis results instantly as they're uploaded to the portal.

Fleet-wide Trend Analysis

Spot emerging issues and monitor long-term asset health.

Centralised Data Access

Replace paper reports and PDFs with a secure, searchable digital platform.

Faster Insights, Better Planning, Reduced Risk

Centralising data in OLIMS transforms the way teams work.

Improved collaboration

All stakeholders access the same real-time information, improving alignment and decision speed.
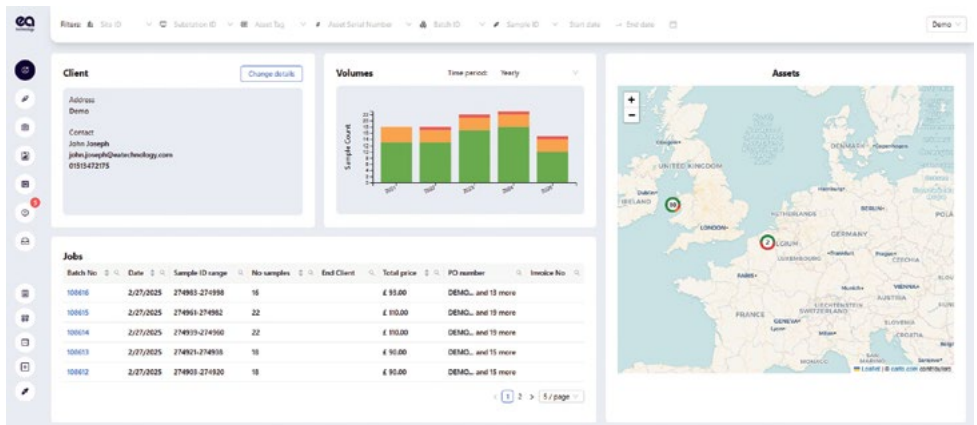

Data Integrity you can trust

Independent studies show over 90% improved data accuracy versus traditional reporting.

Time back in your hands

What once took hours of searching through files or emails can now be done in minutes.

Key Features

Combine condition data with fleet-wide trends to prioritise maintenance, extend asset life, and reduce unnecessary costs.
